

ACCESSIBILITY SUPPORT

For nearly a decade, Vital Source Technologies has been deeply committed to providing superior accessibility options for its desktop, online, and mobile applications. As a part of our mission of helping content reach its destination, we believe accessibility is a fundamental part of our e-textbook solution and that each and every user should be fully supported for every title they use with any of our applications. There are no special versions of our applications required, nor are special versions of the content needed. By supporting industry standards, we enable every user to take advantage of assistive technology as they need it.

Whether it is a new mobile user on iOS or Android™, or a traditional user with Windows®, a Mac®, or a browser, we will be there for you.

OUR COMMITMENT

- Ensure a highly functional application for navigation, display, and every operation
- Leveraging OS-based utilities (TalkBack, VoiceOver, JAWS, NVDA, Window-Eyes)

- VPAT documents are available at www.vitalsource.com/508
- Regular releases of our web, iOS, Mac®, and Windows® applications bringing accessibility and usability improvements
- Regular collaboration and review with independent consultants and industry experts such as the NFB, AFB, TechForAll, JISC, the Publishers Licensing Society, and others
- Ongoing publisher education and guidance
- Access to epub and PDF based formats
- MathML compatibility
- Media and audio support (with interactivity in EPUB3)
- Regular testing with blind and visually impaired users to identify the solutions needed
- WCAG 2.0 Level A; Level AA web accessibility guidelines for VitalSource® Bookshelf® online
- Section 508 Accessibility Standards (1194.21 and 1194.31) for Bookshelf

VITALSOURCE IS THE LEADING E-TEXTBOOK PLATFORM IN THE WORLD WITH MORE THAN:

- 3.25 million students
- 6000 campuses
- 300 publishers
- 25 languages
- 200 countries

We power online access plus full-book downloads through native apps on computers and leading mobile devices.

Currently, Vital Source Technologies is adding more than 10,000 new users every week.
